Hey Dean, I am sending this to you so others can benefit from the story.

A customer of mine, Mrs. Pat Bass, came by my store 10 days ago very distraught. She was hoping I could help her with a problem. Her husband's sodium level was very low. His level was 112 while normal is at 137. His age was in the mid 70's. Their cardiologist and other doctors were not able to do anything for him while his energy was very bad and he could hardly move around.

I spoke with Dean Martens at Herbs of Light that day and asked him for some guidance. He mentioned for me to suggest their new product Himalayan Crystal Salt capsules that we had just got in our store. What great timing! Dean had told me about the great health benefits that this salt had in capsule form so I sold Mrs. Bass a couple of bottles and asked her to let me know if Mr, Bass got any help from them.

Pat just came by my store again today and was very excited. In just over one week her husband, Oscar's sodium level was 134, just below normal. He had taken 2 capsules, 3 times a day. Their Cardiologist, the Chief Cardiologist at West Broward Hospital, was very impressed. He said I don't know what you're doing, but, keep doing it. He told them they don't have to come back for 6 months, which was great news for them.

Oscar now has good energy that he hasn't had in years. Pat told me today that they took a little trip for the first time in a long time. She told me you helped get my husband back to me!

As a retailer, it is very gratifying to help someone so much. Thanks to Dean and Herbs of Light for their commitment not only to quality, but for bringing these types of exceptional new products to our market.
